The Whitby - showing the driftwood effect option

REMOTE CONTROL OPTION

The remote control is an option on both our gas stoves. It doesn't require mains power as it is battery operated by a 9v and 4 x AA batteries (supplied).

STOVE COLOUR OPTIONS

Our Stoves and flue pipes come as standard in black but the whole range is available in the colours shown below at a small extra charge.

The special paint we use is extremely resistant to high temperatures.

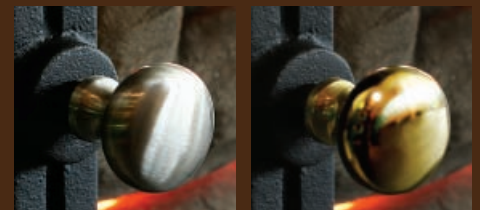

Our Whitby Stove finished in Sky Blue.

The Kirkdale - showing the grooved door and driftwood effect options

	
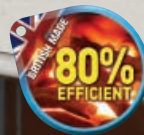

PEWTER	SURF SAND
	
METALLIC BLUE	SKY BLUE
	
RICH BROWN METALLIC	HONEY GLO BROWN
	
MOSS GREEN METALLIC	SHIMMERING ROSE

FITTINGS OPTION

Optional brushed steel or brass fittings on all our stoves.

The Whitby - showing the random coal effect option

THE WHITBY

The Whitby natural gas stove combines the appeal of a real fire with the control and convenience of gas, giving instant warmth from realistic coal or log effect fire. The large glass door gives a wonderful view of the new fuel beds, the coals shown here are random, mixed coals.

A very efficient stove with built in safety features, including an oxygen depletion sensor and a thermal cut-out.

Although a larger stove, the input is 6.8kW, so there is normally no need for any extra air vent, but still a good output of 5.4kW, giving an amazing 80% efficiency.

- Natural gas
- Driftwood or coal effect
- Manual or remote control option available
- 80% efficiency
- British made
- Hidden front control
- Brushed steel or brass fittings
- Class1 or Class2 (5" diameter or pre-cast)
- Top flue outlet or rear closure plate version
- Variable heat output, up to 5.4kW
- Safety features fitted

The Kirkdale - showing the grooved door and the random coal effect options

THE KIRKDALE

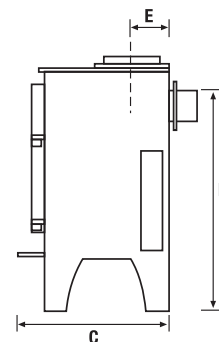

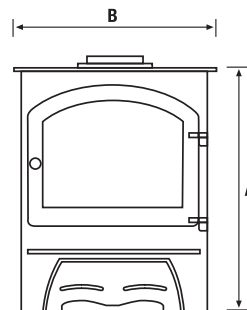

The Kirkdale is a natural gas stove which will look at home in a traditional or contemporary room.

Made to suit either Class1 or Class2 flues, the flue outlet can be from the top (5" diameter), or from the rectangular spigot from the rear, for use in pre-cast flue blocks with the closure plate supplied.

The Kirkdale is fitted with a thermal cut-out for your safety in down draft situations, along with an oxygen depletion sensor.
